

# HOW TO SETUP

OVER >

 TentCraft | **MONARCH**TENT SYSTEM  
Counter System

[TentCraft.com/MONARCH](https://TentCraft.com/MONARCH)

1

Unpack countertops and hardware from the accessory bag.

2

Prepare the counters for installation by removing the leg (or legs) from the bracket. If counter has no legs, proceed to **step 4**.

3

Press the push button in and slide the leg into the metal bracket on the side of the counter with the clamp until it snaps into place. **REPEAT** for the second countertop.

4

To attach the counter to the tent leg, make sure that the metal tabs on each of the clamps are open and align the metal notch on the clamp to the hole in the tent leg. Once aligned, fold metal tab back to lock your counter in place.

5

Attach the second counter by inserting the square pegs found underneath into the brackets below the first counter. Use the latch between the brackets to lock the counters together.

6

**REPEAT step 4** to attach the countertop to the second tent leg.
