MONARCH TENT SYSTEM

Half Wall Bar

TentCraft.com/MONARCH

1 Unpack half wall bars from the accessory bag. If bar is a single piece, proceed to **step 3**.

2 To build the half wall bar, take small connector piece and align with the half wall bar hole. Press the button in and slide the bar until it snaps into place. **REPEAT** for the second piece half wall bar.

3 To attach the half wall bar to the tent leg, make sure that the metal tabs on each of the clamps are open and align the metal notch on the clamp to the hole in the tent leg.

4 Once aligned, fold metal tab back to lock your half wall bar in place. **REPEAT step 3** to attach the other side of the half wall bar to tent leg.

5 Attach walls by feeding the white rope on the top of your wall through the metal channel located on the front side bottom of the half wall bar.
