SEGWALLSPECS

SEG (Silicone Edge Graphics) fabric displays are a popular solution for trade shows and indoor event displays. A SEG display combines printed fabric signage with a 3 millimeter silicone beading, ensuring a smooth, wrinkle-free fit into edgeless frames.

We offer complete SEG systems, including fabric displays and durable frames, as well as the option to custom print and cut tension fabric displays to perfectly match your existing silicone edge graphics frame.

STANDARD

Size	Packed Size	Packed Weight	Foot Length	Frame Depth
