MONARCH TENT

Heavy Duty Pop Up Framework

Lifetime Frame Warranty

3-Day Turn Time

While the value and the convenience of the pop up tent frame hasn't changed, the traditional canopy shape doesn't always fit the experience. The **MONARCH TENT** framework is available in six unique canopy styles and shapes. Every model is built-to-order and tailored to fit your experience. Whether you need something taller, shorter, wider, or customized to look like a brand's packaging or storefront—we can make it happen.

Hex Roof

Monarch Stall

WHAT'S POSSIBLE?

EVENT TRUSS

Lightweight | Quick Assembly | 2-3 Week Turn Time

Truss assemblies like giant LEGOS. Smaller, lightweight quickly snap-together to accommodate all sorts of footprint sizes and shapes. Common applications include custom backdrops, event entrances, product demos, indoor/outdoor exhibits, VIP lounges, and more.

WHAT'S POSSIBLE?

FRAME TENT

Tool-Free, Semi-Permanent Framework | 1 Week Turn Time | 30-45 Minute Setup Time

Heavy duty, pole-style framework available in the following sizes: 10x10, 10x20, 15x15, 15x30, 20x20, 20x30, 20x40. This framework can be left up for weeks or months at a time, making the frame tent a semi-permanent solution. Ballasting options include stakes, water barrels, and concrete blocks which can be hidden with custom printed covers to create a professional and seamless experience.

WHAT'S POSSIBLE?

FUTURETRAC

Customizable, Semi-Permanent Framework | 1-4 hour setup time | 2-3 Week Turn Time

A keder-style framework engineered for larger footprints and specific wind load requirements. The FutureTrac can be up to 50' wide with extensions available in 10', 15', and 20' increments. Wall and roof panels can be customized with digital print, windows, doors, and more, creating a unique environment for your next event or activation. Whether you need an open-air setting, enclosed structure with a temperature-controlled environment, or a drive-thru experience, FutureTrac fits numerous applications.

WHAT'S POSSIBLE?

GEODESIC EVENT DOMES

Tool-Free

| *Easy Transport*

| *2 Week Turn Time*

| *60-90 Minute Setup Time*

The geodesic event dome is lighter, easier to transport, and quicker to set-up than a traditional geodesic dome. With 3-way push button connectors, the tool-free geodesic dome is 60% lighter than steel models, making it much easier to transport and assemble. The aluminum frame provides the best strength-to-weight ratio and reduces the number of poles needed to assemble the structure. The entire tool-free geodesic dome breaks down to fit inside of an included transport wagon—making it easy to transport wherever you need to make an impression.

WHAT'S POSSIBLE?

INFLATABLES

Modern | Lightweight | Maximum Mobility | Extreme Durability

If you want to easily set up, tear down, and transport your custom marketing assets with minimal people – and stand out from the competition in the process – TentCraft's custom inflatable event assets are great investments. From canopies to furniture, our quick-deploy inflatables can be setup in the toughest of locations by a single person.

WHAT'S POSSIBLE?

MEDIA WALLS

Modular Framework for Small & Large Displays

| 5-7 Day Turn Time

This modular, lightweight framework quickly assembles to create simple backdrops, tunnels, or larger displays wrapped in a wrinkle-free powerstretch material. Hardware fits in carry bags for easy transport.

WHAT'S POSSIBLE?

SEG | SILICONE EDGE GRAPHICS

Durable Frames | Backlighting Available | Custom Sizing

SEG (Silicone Edge Graphics) is printed fabric signage with a silicone beading that hugs the edges, fitting seamlessly into edgeless framing for a wrinkle-free display. It is often set up with LED lights inside the frame to make your signage glow on the show floor.

WHAT'S POSSIBLE?

MONARCHFLAG

Withstands winds up to 35mph | 16ft Tall | Sets up in minutes

The TentCraft **MONARCHFLAG** – a more affordable FlagStand XL alternative – is our product lineup's biggest and most heavy-duty custom flag solution. Equipped with a telescopic leg function that extends the entire flag to more than 16 feet tall, event attendees won't miss your business' next activation.

Overall Height.....	16' 7-1/2"
Flag Size.....	42"x156"
Flag Hardware Weight.....	30lbs

WHAT'S POSSIBLE?

FALCONBOARD

FalconBoard is a durable and eco-friendly print substrate made from recycled paperboard. It can be easily cut, shaped, and mounted, making it suitable for a wide range of applications, including point-of-purchase displays, trade show graphics, and indoor signage.

ULTRABOARD

Ultraboard combines lightweight durability, high print quality, and versatility, making it an excellent choice for professional display and signage needs. Made with a foam core and laminated with polystyrene facings, Ultraboard is resistant to warping, dents, and moisture, ensuring long-lasting performance in both indoor and outdoor environments.

SINTRA

Sintra offers a combination of strength, print quality, and versatility, making it a premium choice for professional signage, displays, and promotional materials. It is commonly used for a variety of applications, including signage, trade show displays, point-of-purchase graphics, and custom-shaped cutouts.

COROPLAST

Coroplast is a lightweight, durable, and cost-effective corrugated plastic substrate widely used for a variety of print applications. One of the most cost-effective substrates available, Coroplast provides excellent value for high-volume print runs and budget-conscious projects, such as yard signs and event displays.

RIGID SIGNAGE

Custom Sizing & Shapes | Moisture Resistant | Double-sided Printing

Rigid signage is often used in A-frames, menu boards, and within retail storefronts, but our rigid signage can be made into custom shapes—and the ways it can be used are constrained only by your imagination. TentCraft's rigid signage solutions work with our custom pop-up canopies, media walls, and frame tents. You can quickly attach rigid signage to all parts of the tent, including the legs, valance, gable, and peak, creating something completely unique.
