

Pop-up Drone Enclosure System

Engineered for professional use, this heavy duty solution creates a protected yet accessible environment for training, display, and demos. Drone enclosures can be built on the TentCraft **MONARCHTENT** or **mightyTENT** frame. The gold standard amongst professional grade pop-up tents and the superior choice among businesses that demand only the best.

Available Sizes – 5X5, 5X10, 8X8, 10X10, 10X20, 13X13, and 15X15

5

5 Day Turn Time

Ready to ship to your event fast. Designed, printed and fabricated in an average of 5 business days.

Made in the USA

Every detail has been meticulously scrutinized, and painstakingly pushed to perfection – resulting in the quality and value expected from an American made product.

Custom Fabricated Net Walls

Braided knotless twine made from high-density poly, creates a safe and weather resistant enclosure.

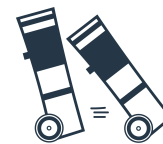

Frame

The anodized aluminum frame, octagonal legs, and aluminum elements make this the most robust frame in the market – period.

Roof

600 denier polyester custom cut to ensure proper fit and finish. The customizable canopy is coated for water resistance, UV protection, mold and mildew protection and ready for outdoor events.

Integrated Transport System

Each tent is engineered with patented foot pads which allow the included wheel kit to be effortlessly attached for easy mobility and transport.
